KEY RESPONSIBILITIES:
- design / configuration of PV power plant,
- technical & drawing documentation (line diagram/one pole schemes),
- management of our external design suppliers & coordination of your work with our internal partners,
- support to our colleagues during the construction,
- reporting.

REQUIREMENTS:
- High School/University Degree (Electrical engineering preferably),
- English (B2) as this is our work language,
- skills to complete the documentation (drafts – designs - studies): we expect you to show us what you have done so far in creation of the electro documentation,
- knowledge of design documentation norms,
- competence to effectively manage and control individual engineering (design) suppliers & ability to properly communicate tasks to those partners,
- pro-active approach – search for inputs you need for your work: we expect you know what to do and you are focused to deliver.

WHAT DO WE OFFER:
- work in the lucrative and promising sector of renewable energy,
- excellent opportunity to start a career for students and graduates,
- opportunity to learn and grow professionally under the guidance of experienced colleagues,
- an interesting, challenging, and meaningful job as part of a friendly international team,
- nice and modern offices at Palmovka,
- possibility for part or full-time,
- flexible working hours and occasional home-office,
- 5 weeks of paid holidays,
- MultiSport card,
- occasional refreshments at the workplace and business breakfasts,
- team-buildings and corporate events,
- dog friendly office.
