

Job Title: Junior Energy Technician

Company: Third Source Energy s.r.o.

Location: Prague, Czech Republic

Type: Contract up to 1 year

About the Role: We are looking for a proactive Junior Energy Technician to join our team in Prague. This position is suitable for candidates currently pursuing or who have completed a degree in Energy Sciences, Environmental Engineering, or a related field. The successful candidate will play a supportive role in a variety of energy projects, including renewable energy, oil and gas, and electrical sectors. This position offers a great opportunity to gain diverse experience and contribute to the development of sustainable and conventional energy solutions.

Key Responsibilities:

- Assist in the planning and implementation of energy projects across renewable and conventional sectors, including geothermal, solar, oil and gas.
- Conduct data analysis and compile reports using Microsoft Excel.
- Utilize Geographic Information Systems (GIS) for mapping and analysis of project sites.
- Collaborate with project teams to meet technical specifications and project milestones.
- Participate in field operations, including site evaluations and the deployment of technology solutions.
- Monitor and report on the progress of projects, identifying any potential issues.
- Stay informed on the latest industry developments, technologies, and compliance regulations.

Requirements:

- Enrollment in or completion of a Bachelor's degree in Energy Sciences, Environmental Engineering, Electrical Engineering, or related fields.
- Proficiency in Microsoft Excel.
- Experience in energy projects, including geothermal, solar, oil and gas, is an asset but not required.
- Fluent English and Czech language skills; additional languages are a plus.
- GIS capabilities are beneficial but not mandatory.
- Strong analytical skills and attention to detail.
- Ability to work both independently and as part of a multidisciplinary team.
- Flexibility to travel for project needs.

What We Offer:

- A platform to work across various energy sectors, enhancing your expertise in both renewable and conventional energy.
- Competitive compensation and benefits.
- Opportunities for professional growth and development inside a multi-national organization with highly experienced professionals.
- A collaborative and forward-thinking workplace culture.

Application Process: To apply, please send your resume/CV to spearson@thirdsource.energy. We accept applications on a rolling basis until the position is filled.
