# Petr Ryšavý
Ph.D. student and researcher

Dept. of Computer Science

petr.rysavy@fel.cvut.cz
https://ida.fel.cvut.cz/~rysavy

- Ph.D. student of the Artificial Intelligence and Biocybernetics program since 2016.
- I actively participate in both:
  - research (3 core rank A conference publications in past 3 years, 1 journal publication), and
  - teaching (A4B33ALG (2016), B4M33PAL (2016-18), B4M36SMU (2017-19), B4M36BIN (2018-19)).
- I help with algorithms lectures for future and bachelor students (LASO 2016-18).

- I believe that research and teaching should be supported equally.
- Teaching is an investment in future research, and research is an investment in future teaching.
- Internationalization is one of the best ways to improve both.

- If elected, I will try to participate in all senate meetings, and I will get acquainted with the submitted documents in advance.
- Most relevant boards for me are the Pedagogical Board, and the Science and Research Board.

I consent to my candidacy to the academic senate of FEE, CTU. *Se svou kandidaturou do AS FEL souhlasím.* In Prague on Tue 26th Feb, 2019.
