# CISCO–ČVUT **Joint Research Programme**

Call for Proposals

for the period January 2015 – October 2015

As part of 5–year CISCO–ČVUT Joint Research Programme we open the 2nd call for research programme proposals.

Cisco R&D, the team behind Cognitive Threat Analytics (CTA), headquartered in Prague, invites the researchers from Czech Technical University, Faculty of Electrical Engineering to submit proposals for seed research projects, funded by CISCO–ČVUT Joint Research Programme. CTA team is interested in proposals from the areas of machine learning, data analytics, encryption, game theory, adversarial planning, mobile computing, pattern matching and computer vision for network security as well as cloud computing, parallel computing and mobile computing. The proposers are invited to consult the proposal ideas with Cisco research programme coordinator prior to final submission.

The form of the proposal includes one page (A4) max of the research idea and commitment to deliverable result, one page max of state-of-the-art justification (including references), one page max of the proposer's biography (including important relevant publications and basic citation statistics). The proposals shall be submitted by December 18, 24.00 CET to programme coordinator Petr Somol. Feel free to consult possible research areas, scope and other details of possible cooperation before submitting.
